Objective

Software Developer with expertise in java, SpringBoot, .NET, React, MySQL. Passionate about developing scalable applications, optimizing performance, and solving real-world challenges. Seeking opportunities to contribute technical skills and innovation in a dynamic environment.

Education

GS Moze College of Engineering, Pune <i>Bachelor of Engineering in the branch of Information Technology</i>	June 2018 – July 2023 <i>CGPA: 8.2/10</i>
Shri Shanishwar Junior College, Sonai <i>12th in the branch of Computer Science</i>	May 2017 – June 2018 <i>Percentage: 75/100</i>
New English School , Sonai <i>10th in the branch of Science</i>	May 2015 – June 2016 <i>Percentage: 83/100</i>

Technical Skills

Languages/Database: Java,MySQL,Javascript,HTML,CSS
Web Technologies: SpringBoot,MS.Net,ReactJs,Redux,Express,Bootstrap,
Software & Tools: Git ,GitHub,Postman,EclipseIDE ,VS code

Certifications

C-DAC(Development of Advanced Computing)	Aug 2024 – Feb 2025 <i>Sunbeam Infotech,Pune</i>
---	--

Experience

TRON Softech <i>Web Developer Intern</i> - Managing UI using HTML,CSS,BOOTSTRAP and ReactJS - Creating Dynamic Web Pages using java ,jsp - working on JDBC for fetching the data from backend	Jan 2022 – Sept 2022 <i>Pune</i>
---	--

Projects

TaskBuddy <i>React (Frontend), .NET API (Backend), SQL Server (Database).</i> Git - User Registration and Authentication. - Task Booking and Management. - Task Status Tracking. - Chat and Notifications.	Nov 2024 – Feb 2025
MovieStar-Movies Book Project <i>ReactJS, Redux,TMDB API,HTML/SCSS</i> Git Live Demo - Developed a dynamic and user-friendly Movies Book application. - React providing interactive experience for users. - Utilized Redux for state management, ensuring a centralized and predictable state flow. - Integrated the TMDB (The Movie Database) API as the backend data source . - Implemented responsive and aesthetically pleasing user interfaces using HTML and SCSS .	Dec 2023 – Jan 2024
MERN Stack Ecommerce Application <i>ReactJS, Express, MongoDB, HTML/CSS</i> Git Live Demo - Dynamic User Interface with React. - Scalable and Flexible Data Storage with MongoDB. - Robust Server-Side Development with Express.js. - Efficient Server-Side Execution with Node.js . - Integrated Secure Payment Gateway .	Aug 2023 – Nov 2023
Empowering Safety:Android Based App <i>Android ,JAVA,kotlin , Firebase ,XML</i> Git - This is Academic Project. - Developed an Android application using Java and kotlin technologies. - Employed XML for frontend development, creating visually appealing and interactive user interfaces.	sept 2022 – may 2023

- Integrated Firebase database for seamless data storage, retrieval, and real-time synchronization.

Shopping website | *JAVA, JSP, JDBC, MYSQL* [Git](#)

April –Nov 2021

- It is a web-based application developed using Java, JSP, HTML, CSS, and MySQL database.
- The front-end of the application is designed using HTML and CSS
- MySQL database is used to store product information, user details, and order information
- The application uses JDBC to interact with the database
